

Experiment 7.1

Determination of Capacitance of an Isolated Sphere

Code File Name: Exp7_1_Capacitance_Isolated_Sphere.m

Code

```
clc;
clear;
epsilon0 = 8.854e-12;
R = input('Enter radius of sphere (m):');
C = 4*pi*epsilon0*R;
disp('Capacitance of isolated sphere is');
disp(C);
```

Command Prompt

```
Enter radius of sphere (m):0.5
Capacitance of isolated sphere is
    5.5631e-11
```
